Hello Everyone,

As we enter the dog days of summer, it is important to try to find away to escape from every day pressures and unwind. Whether you do it with family and grandkids like I was able to do this past weekend or find cool getaway from the heat, it is something that can recharge your batteries and get one back into the game with a renewed focus and thankfulness for just being alive. So please make a point to escape as soon as you can this month!

I want to thank last month’s presenter, Adam Jilani, of Clear Result for his presentation on OPEN – Small Business Incentive Program and its software interface.

Please join us on Tuesday, July 23rd for a tour of the new TES Chilled Water Tank at the Domain in Austin. First, we will meet at the Park Restaurant located on the ground level of the ALOFT Hotel Domain for lunch and a short presentation. Details are in the newsletter.

Have a Great Month,
Frank
Frank Richards
Chapter President
July Tour

Domain TES Project

Come join us this month for a tour of Austin Energy’s Dominion Thermal Energy Storage project.

The Domain District Cooling System is located in northwest Austin, Along North MoPac (Loop 1) between Braker Lane and Burnet Road. It serves a 6000 ton load providing 42°F continuous cooling services to The Domain tenants, serving a mix of retail, office, and residential customers. The latest addition is the construction of 2.4 million gallon cold water storage tank, which is designed to store 24,000 ton-hours of cooling (6000 tons for 4 hours). The tank is 96' in diameter and 53' tall. The foundation was poured three weeks ago and 20 tilt wall panels are being stood up and positioned this week. The TES tank will allow the plant to produce and store cold water during off-peak hours, when electric prices are cheaper, and then distribute the chilled water for customer use during the peak hours, when it is most needed. The tour itself will require climbing three flights of stairs to the roof and back down. Please wear flat, closed toe shoes.

Dennis Lilley, CEM, PMP
Project Manager
Austin Energy

Wayne McKinsey
O&M Superintendent
Austin Energy

Dennis and Wayne will give a short presentation during lunch (before the tour) at The Park restaurant's Clubhouse room.
On the Scene

Our June meeting was held at Texas Land and Cattle Company in Austin, TX and featured a presentation titled "OPEN - Small Business Incentive Program". Thank you to Adam Jilani for a great presentation!!

8th Annual FEMWorks Program

Federal Energy Management Workshops

as part of the

36th World Energy Engineering Congress (WEEC)

Walter E. Washington Convention Center, Washington DC

September 25-27, 2013

The WEEC is the best opportunity for government energy and facility managers to enhance their training, apply real world solutions for government energy management, and stay current on government energy cost reduction goals and mandates.

The companion 8th Annual Federal Energy Management Workshops (FEMWorks) program is designed especially for the government sector and other energy management professionals.

FEMWorks provides the tools to help government agencies reduce their dependence on oil and to positively impact the economy. The WEEC is the largest and most prestigious energy efficiency, facilities upgrade, and renewable energy event in the nation, featuring 13 conference tracks, 20 seminars, over 300 speakers, and a huge exposition of the latest products and services. As the largest consumer of energy in the U.S. economy, the Federal government leads by example when it comes to implementing innovative ideas learned at the WEEC and FEMWorks.

Do you know of a technology or a tour that would be of interest to our chapter membership? The board of directors welcomes your ideas and thoughts as they begin to develop the 2013 meeting calendar. Our chapter is only as good as the membership makes it...it is your chapter, please participate and provide input into the selection of presentations and tours!

---

How Hot Is It ???

- you learn that a seat belt makes a pretty good branding iron.
- you realize you have vinyl upholstery in your car.
- the temperature drops below 95, you feel a bit chilly.

To Be Continued...

Our Mission:

◊ Advance the professional careers and the common purposes of its members. Facilitate networking, social exchange and training.

◊ Present and discuss energy, environmental topics, and members’ ideas. Stay abreast of fast changing developments. Anticipate their future.

◊ Disseminate information to the trade and to the general public via meetings, publications, trade shows and presentations.

◊ Build an exciting, expanding chapter

◊ Cooperate with other AEE chapters and related organizations.

◊ Promote energy efficiency.
