March Presentation

Austin 2030 District:
What Has My Data Done for Me Lately?

The Austin 2030 District uses energy and water data to track a total, aggregate District performance. But individual buildings want to see maximum reduction of monthly costs, and also make smart economic decisions about equipment repair and replacement, and facility upgrades. Professional Member Bractlet, an award-winning energy-simulation company based in Austin, will show how simulations of this type increase net operating income and market value of existing buildings. Bractlet was recently featured in Forbes and is a locally-grown company. This is a session of high value to building owners and operators!

March Speaker

Mr. Mark Ellsworth
Vice President of Sales
Chief Revenue Officer
Bractlet, Inc.

With 25+ years of sales management and leadership experience in the energy and commercial building industries, Mark understands the
customer pain points with energy inefficiency and how Bractlet can help. Mark received a BBA from Drury University. When not helping customers save energy, Mark is relaxing in his backyard arboretum (and well deserved with two sons now in college).

(Continued from page 1)

Register by clicking icon to the left. There are two options: $20 for lunch, or $0 to bring your own lunch. As an AEE member, you can take advantage of membership rates of the Austin 2030 District.

Directions To Meeting

THE BUILDING OPERATOR CERTIFICATION (BOC®) PROGRAM

The Building Operator Certification (BOC®) Program helps building engineers, maintenance supervisors and others advance their skills in the energy efficiency operation of commercial buildings. This nationally recognized training and certification program creates more comfortable, energy efficient facilities. The 72 hours of focus areas for the classroom and hands on training include the following class topics:

• Energy Efficient Operations of Building HVAC Systems (2 days)
• Measuring and Benchmarking Energy Performance
• Efficient Lighting Fundamentals
• HVAC Controls Fundamentals
• Indoor Environmental Quality
• Common Opportunities for Low-Cost Operational Improvement
• One supplemental course, such as Electrical Systems, Ventilation Strategies, O&M Practices

Do you know of a technology or a tour that would be of interest to our chapter membership? The board of directors welcomes your ideas and thoughts. Our chapter is only as good as the membership makes it...it is your chapter, please participate and provide input into the selection of presentations and tours! If your recommendation is used...it’s good for a free lunch for you!

Contact Amanda Cambre amanda.cambre@clearesult.com with your ideas!

On The Scene
Photos by Linda Rickard

Our chapter held it’s February meeting at Texas Land and Cattle in Austin, TX. A big Thank You to Brian Stevens for the presentation “Texas National Guard Resilience: Readiness for the Unknown”
Our Mission:

◊ Advance the professional careers and the common purposes of its members. Facilitate networking, social exchange and training.

◊ Present and discuss energy, environmental topics, and members’ ideas. Stay abreast of fast changing developments. Anticipate their future.

◊ Disseminate information to the trade and to the general public via meetings, publications, trade shows and presentations.

◊ Build an exciting, expanding chapter

◊ Cooperate with other AEE chapters and related organizations.

◊ Promote energy efficiency.
